A screenshot of a web browser window. The address bar shows 'localhost:61097/WebForm1.aspx'. The page content displays a table with four columns: 'account_name', 'account_number', 'balance', and 'current_balance'. The first row of data shows 'sudha' for the account name, 'a00001' for the account number, '26200' for the balance, and '25200' for the current balance.

account_name	account_number	balance	current_balance
sudha	a00001	26200	25200
